

CompTIA Server+

Materials & teaching in English

Enhance your skills in CompTIA Server+, Networking, and Security

As a CompTIA Server+ Professional, you will become an expert in configuring and managing servers, including user and network management, security, and virtualization.

You will work on ensuring the stable and secure operation of the server and the processes it supports within the organization and the network, taking into account considerations such as hardware, software, workflows, security, and more.

In this e-learning course, you will be taught the full spec trum of server disciplines, starting from basic configuration to operation, troubleshooting, optimization, and scaling. Along the way, you will cover topics such as storage, access control, and backup.

You will receive training in the curriculum corresponding to the following certifications:

- 220-1101 (CompTIA A+)
- 220-1102 (CompTIA A+)
- SKO-005 (CompTIA Server+)

As part of this e-learning course, we offer 1 certification at tempt. This must be held within 1 month after the end of the course - otherwise the offer will lapse. Certificates are taken at the end of the course.

You will learn

Hardware Components & System Configuration

- Install hardware, display units, and power supplies
- Configure mobile device accessories and network settings
- Set up RAM, storage, motherboards, CPUs, and add-on cards
- Manage multifunction devices, printers, and consumables

Server Architecture & Role Deployment

- Identify core server components and configuration methods
- Set up server storage and role-specific deployments
- Manage server-based and cloud-integrated computing
- Enable secure file systems and network services

Operating Systems & Virtualization

- Configure desktop, server, and mobile operating systems
- Manage Linux, macOS, and Windows file systems
- Understand client-side virtualization and troubleshooting basics
- Deploy and manage cloud IaaS, PaaS, and SaaS solutions

Security Concepts & Access Control

- Apply wireless security and authentication protocols
- Configure access control, PKI, and authorization
- Secure mobile, embedded, and physical devices
- Protect data privacy and system integrity

Networking & Communication Protocols

- Apply networking fundamentals, cable types, and connectors
- Configure wireless networking, services, and remote access
- Work with TCP/IP, network communication, and directory services
- Understand network firewalls and security protocols

Threat Mitigation & Recovery

- Detect, remove, and prevent malware threats
- Recognize and mitigate social engineering attacks
- Manage backup strategies and recovery procedures
- Troubleshoot server performance and resolve critical issues

The course is for you if you...

- ✓ Have experience in using PCs and the internet
- ✓ Possibly have experience with IT security and infrastructure
- ✓ Are motivated and have ambitions to work with CompTIA

Course Structure

The e-learning course is divided into in-depth sessions with associated Labs and MeasureUp tests, so you gain a lot of knowledge and at the same time you can test your readiness. As a supplement to the e-learning course, you also get access to a whole library of e-book

Certification

You have the option to take certifications 220-1101, 220-1102 og SKO-005. Included in this e-learning package is 1 certification attempt. Please note that this trial must be held within 1 month of the end of the course - otherwise the offer will lapse. Certifications are taken after completing the course. When you contact us, we will send you a voucher to book the certification.

Careercoach

You also can spar with Itucation's career coach regarding CV, application and job strategy. If you wish to take advantage of this offer, please send an email to kurser@itucation.dk

Upcoming courses

- Start every monday!
