

CompTIA Network+

Materials & teaching in English

Enhance your skills in CompTIA Network+

As a CompTIA Network+ Professional, you become an expert in designing, implementing, and maintaining enterprise networks. You will work on incorporating the network into a context that supports users, business processes, systems, and the right mix of flexibility, performance, and security.

In this e-learning course, you will be taught the full spectrum of network concepts and theory, as well as architecture for operation and troubleshooting. You will gain a foundation in both hardware and software to ensure top performance, security, and uptime. You will also be equipped for effective troubleshooting and issue resolution

You will receive training in the curriculum corresponding to the following certifications:

- 220-1101 (CompTIA A+)
- 220-1102 (CompTIA A+)
- N10-009 (CompTIA Network+)

As part of this e-learning course, we offer 1 certification attempt. This must be held within 1 month after the end of the course - otherwise the offer will lapse. Certificates are taken at the end of the course

You will learn

Hardware Components & Device Configuration

- Install hardware, display components, and accessories
- Configure mobile devices and network connectivity
- Set up RAM, storage, motherboards, CPUs, and add-on cards
- Identify power supplies, printer types, and consumables

Virtualization, Cloud & Datacenter Concepts

- Explain cloud computing models and key concepts
- Set up client-side virtualization environments
- Understand datacenter, cloud, and virtual networking
- Prepare and maintain virtualization infrastructure

Networking Technologies & Connectivity

- Understand networking fundamentals and cable types
- Set up wireless networking and related services
- Deploy wired and wireless devices for network access
- Configure common network services and infrastructure

Security Protocols & Threat Protection

- Apply physical security measures and wireless protocols
- Detect and prevent malware and mobile threats
- Implement authentication methods and social engineering defenses
- Secure embedded and mobile device environments

Operating Systems & File Management

- Configure desktop, server, and mobile operating systems
- Navigate Linux, macOS, and Windows file systems
- Manage operating systems and network configurations
- Apply system-level troubleshooting and optimization

Network Management & Troubleshooting

- Monitor network activity and resolve performance issues
- Maintain network documentation and change logs
- Harden networks using best practice configurations
- Troubleshoot connectivity across varied network infrastructure

The course is for you if you...

- ✓ Have experience in using PCs and the internet
- ✓ Have experience with infrastructure and IT security
- ✓ Are motivated and have ambitions to work with CompTIA

Course Structure

The e-learning course is divided into in-depth sessions with associated Labs and MeasureUp tests, so you gain a lot of knowledge and at the same time you can test your readiness. As a supplement to the e-learning course, you also get access to a whole library of e-book

Certification

You have the option to take certifications 220-1101, 220-1102 og N10-009. Included in this e-learning package is 1 certification attempt. Please note that this trial must be held within 1 month of the end of the course - otherwise the offer will lapse. Certifications are taken after completing the course. When you contact us, we will send you a voucher to book the certification.

Careercoach

You also can spar with Itucation's career coach regarding CV, application and job strategy. If you wish to take advantage of this offer, please send an email to kurser@itucation.dk

Upcoming courses

- Start every monday!
